DETAILED ACTION

1. This application has been transferred to another examiner.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 4-18, 23, 25-39, drawn to a filter for filtering signals in a telecommunications system, classified in class 379, subclass 402, 403, 398.

- II. Claims 19-21, drawn to a method for designing a filter, classified in class 379, subclass 390.04, 391, 390.01, 394.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

In the instant case, the different inventions are unrelated because of the following:

a. Invention I is directed towards a filter for filtering signals in a telecommunications system, wherein the filter has at least one pass band, wherein the characteristic impedance of the filter is complex so that it matches a predetermined complex impedance at least approximately.

b. Invention II is directed towards a method for designing a filter, the method comprising steps of: designing a cable simulator section, and creating a filter from the cable simulator section by adapting the cable simulator section so that it will include at least one attenuation peak in a predetermined frequency range.

Thus, the above two inventions claim distinct inventions. Invention I claims a filter for filtering signals in a telecommunications system, whereas Invention II claims a method for designing a filter out of a cable simulator section.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications and subject matter, the search required for each invention is not required for the other. Therefore, restriction for examination purposes as indicated above is proper. See MPEP 806.05 (d).

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1,48(b) and by the fee required under 37 CFR 1.17(i).

7. A shortened statutory period for response to this office action is set to expire **0 (zero) months and 30 (thirty) days** from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of this application (see 35 U.S.C. 133 and MPEP 710.02, 710.02(b)).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ramnandan Singh whose telephone number is (571) 272-7529. The examiner can normally be reached on M-TH (8:00-5:30).
